

Dr. A.K. Mittal who presently holds the post of Chief Chemist at KDM Institute of Petroleum Exploration, Dehradun has rich experience in the field of petroleum geochemistry with special reference to stable isotopic studies. He has been associated with the Stable Isotope Laboratory at KDMIPE since its inception and contributed in establishing mass spectrometers and different preparation systems at par with the international standards. He had also exposure to drilling technology as a drilling fluid chemist in Upper Assam. He has published several papers in national and international journals and in proceedings of various conferences/seminars and has contributed in the improved understanding of the petroleum systems of Indian sedimentary basins.

The Co-Authors, K. Agarwal, H.C. Pande, K. Lal and A.K. Uniyal were honoured with certificates.
